

Man B.
Thirty-six years old, married, one wife, three children of whom eldest and other two still in school. Has part primary education. Was out for one year when eighteen, but has had no other job since. Took up fishing in 1958 because "fishing is a better job than any other." Has 200 gill net, a plank boat, and one canoe; employs four labourers paid £2.10 a month. Has a twelve-acre garden mostly maize, millet, and cassava, and employs labourers. Owns sixteen cattle, five goats, and twenty chickens. Has £72 income last £85 in four months near Mangochi (southern end of Lake Chilwa) when Chilwa was dry; next year expects £150. Present catch rate would be £100. "People get richer by working hard and starting business with a good net."

Man C.
Forty-five years old, married, one wife, seven children (ages six to nine) of whom all except youngest had or having primary education. Has part primary education. Was a store keeper on a farm from 1955 to 1969 although he first started fishing in 1949. Wants no other job now because "fishing is profitable." Owns khoka costing £250 and a canoe; employs an unspecified number of labourers. Has a one-acre garden growing maize and beans. Owns chickens. Owns a store. Has £10 saved. Income last year £200; next year expects £100. Present catch rate would give £700. When Chilwa dried to Mangochi to fish. "People get richer by working hard and using their net."

Man D.
Fifty-three years old, married, one wife, seven children (ages twenty-one to twenty-three) of whom four have some primary education. Has no education. Has been fishing since seventeen years old. Began with long gill net. Now owns khoka, plank boat, and two canoes; employs labourers. Owns eight-acre farm growing maize and millet and employing two cattle, twelve goats, and ten chickens. Owns a canteen. Income last year because lake was dry; has no fixed expectation next year. Present catch rate would give £600. "People get richer by working hard and having capital."

Man E.
Thirty-five years old, married, one wife, three children (ages twelve to twenty-five), all in primary school. Has no education. Began fishing in 1959; has other job. Started with gill nets; now owns khoka and a canoe. Employs labourers. Has three and one-half acre garden growing maize only. Owns cattle, eight goats, and fifteen chickens. Has £200 saved. Income last year £500; next year expects £800. Present catch rate would give £800. "People get richer by having adequate equipment and sound reasoning."

Man F.
Forty-five years old, widowed (one wife), three children of whom eldest employed and others in school. Has part primary education. Worked as house
